During the month of September the North Liberty Police Dept. conducted a seat belt usage survey of motorists in North Liberty. The survey was conducted in various locations over a 2 day period during daylight hours. The results of the survey were that 95% of motorists utilized seat belts. This is a slight increase over a survey conducted earlier in the year in which 94% usage was observed. The North Liberty Police Dept. commends motorists for using seat belts and encourages motorists to use a seat belt every time they are in a vehicle. The use of a seat belt continues to be a major factor in reducing serious injuries or fatalities in motor vehicle crashes.
