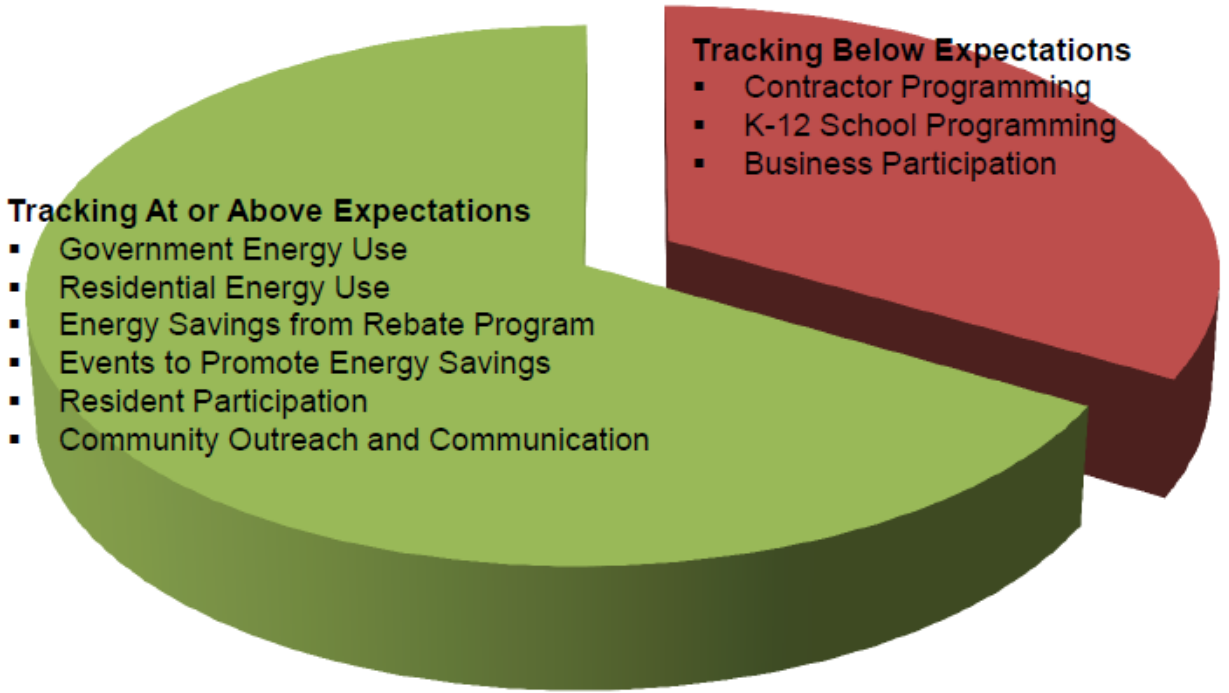
ALLIANT ENERGY®

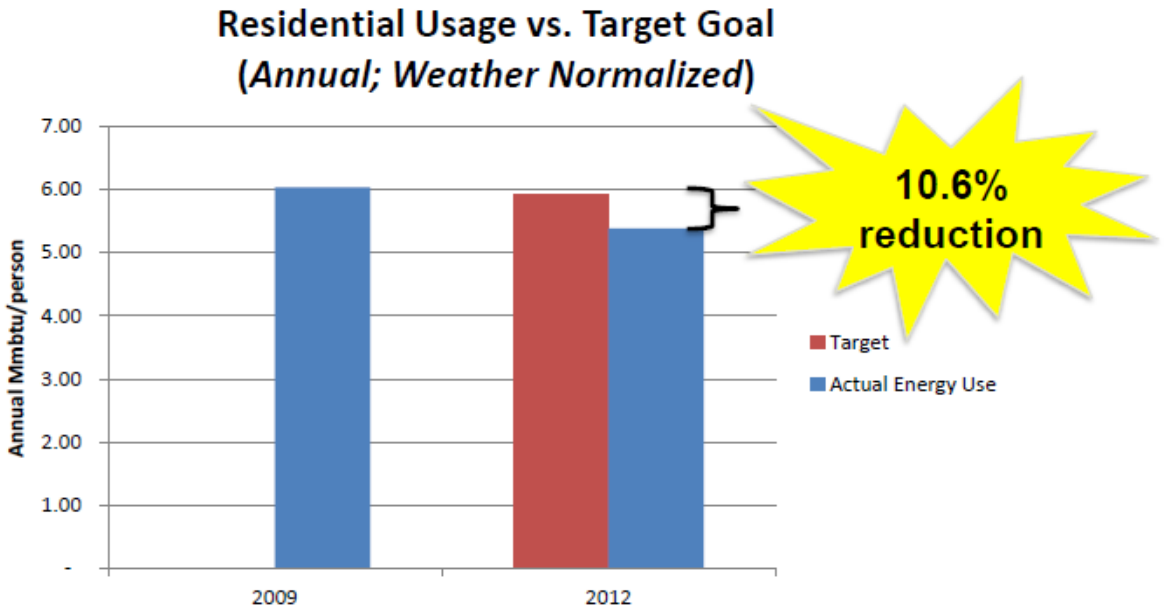
Summary of Progress

1) Two-thirds of goals are tracking at or above expectations
2) Energy savings from electricity use for residential sector reduced by 10.6% per capita over baseline year of 2009
3) Strong education through media outlets yields civic participation results

Progress on Objectives

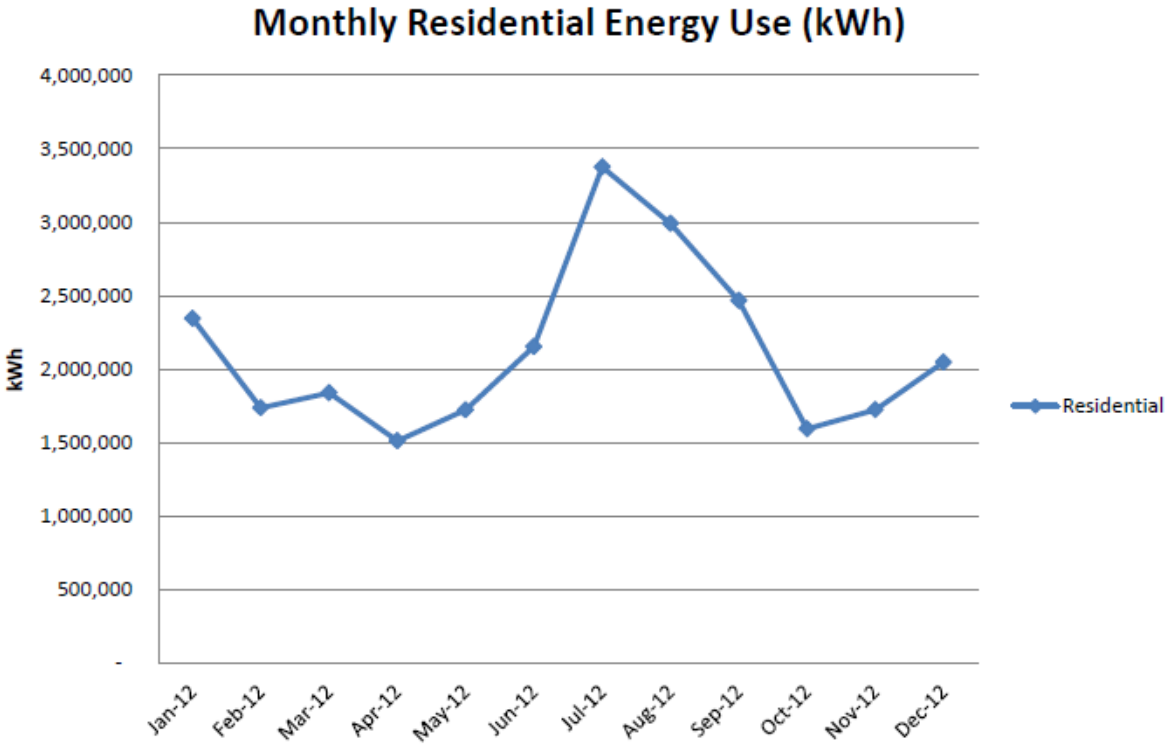


Residential Energy Usage



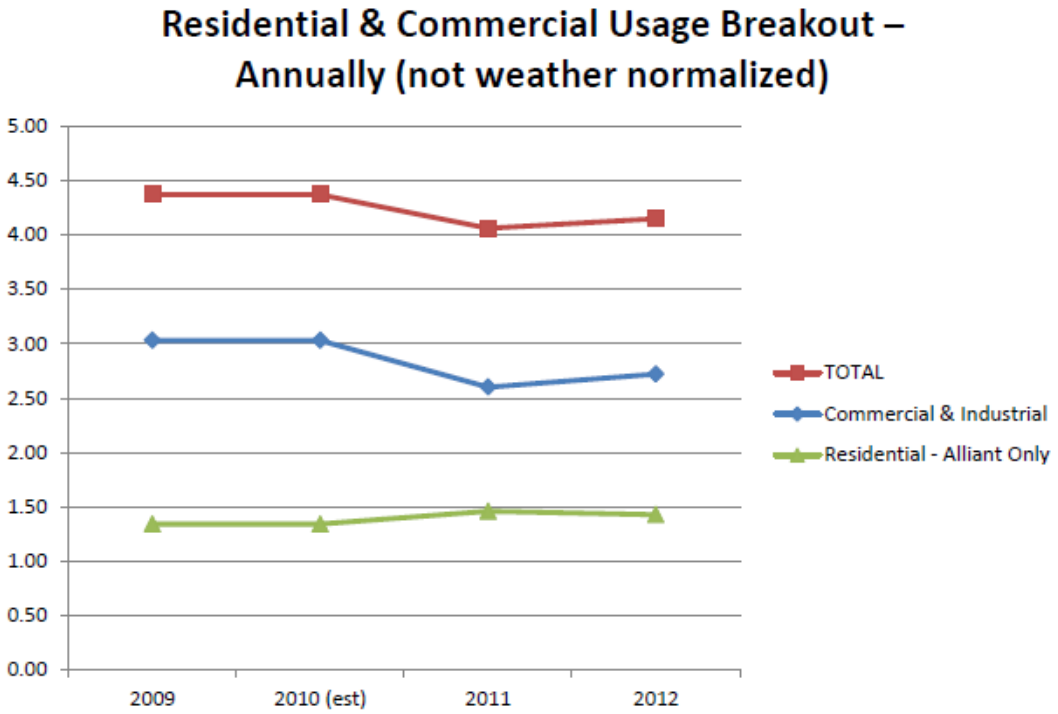
- North Liberty's goal is a 2% decrease in energy usage in 2012 and a 5% decrease by 2020 from the baseline year 2009 usage.
- Weather normalized electricity reduction is **10.6% per capita; down to 5.39 Mmbtu/person from 2009.**
- This does not include Linn County REC (electricity) or Mid-American (natural gas) customers.

Residential Energy Usage



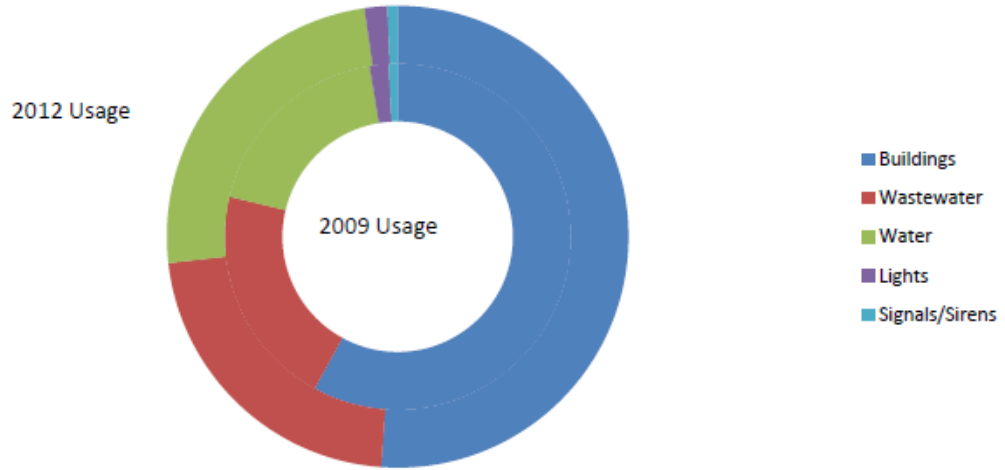
* These values are calculated on an average monthly or quarterly basis from the overall total provided.

Residential & Commercial Energy Usage



Residential & Commercial Energy Usage

City of North Liberty Government Operations Energy Use Breakdown



- North Liberty's goal is a 8% decrease in energy usage in government buildings by December 31, 2012 from the baseline year 2009 usage.
- Total electricity redduction (weather normalized) is **10.93% from 2009.**
- Electricity use from wastewater and water uses increased from 2009; electricity reduction was driven by decreases in building electricity use.
