Mayor Report

PROCLAMATION

February is Black History Month

Whereas, Black History Month is celebrated each February in the United States; and

- Whereas, To preserve and protect the legacy of African-Americans, a time should be set aside to focus and reflect on the lifetime successes and achievements of great leaders, educators, scholars, inventors, politicians, writers, artists and citizens; and
- Whereas, The observance of Black History Month calls our community's attention to the continued need to battle racism and to build a society that lives up to its democratic ideals;
- Now, Therefore, I, Terry L. Donahue, Mayor of the City North Liberty, do hereby publicly join governments across the country to proclaim the month of February 2018 as Black History Month in North Liberty, Iowa, and urge our citizens to recognize this month by becoming aware of the history, culture, legacy, struggles and achievements of African-Americans.

Signed this Thirteenth day of February, 2018.

Terry L. Donahue, Mayor City of North Liberty, Iowa

Johnson County Refuse Service Update

Johnson County Refuse Program Revisions

Community and City Council feedback was a driver for staff to reach out to Johnson County Refuse to discuss the potential to move to a different program for trash and recycling. City staff began meeting with Steve Smith in October to discuss revisions. The following represents the revised program proposal that would begin as soon as automatic trucks and receptacles are purchased and delivered.

- Revise sticker and recycling program. Trash bins and recycle bins owned and distributed by Johnson County Refuse at Johnson County Refuse's expense.
- Trash receptacle 65 gallon. Recycle receptacle 95 gallon (more than five times the size of current bins.
- Annual stickers eliminated. City Hall staff was spending most of June solely selling annual stickers with no revenues coming to the City. Bulky items and additional trash will be picked up curbside with the purchase of stickers. The resident with extra items/trash will contact Johnson County Refuse for the amount necessary. Stickers will be available on a limited access basis.
- Trash route will be extended from one day per week to four or five days per week. The City would be divided up into zones for routes.
- Refuse trucks would be automated. All recycling and trash need to fit within the receptacle. The driver will not be getting out of the truck to pick up loose items.
- Old bins can be repurposed by property owners or set out on specific dates for pickup and recycling.
- Johnson County Refuse needs the City's commitment in a long-term contract to move to this program for financing purposes. Every single family and duplex unit must participate in order for this program to financially work.
- The cost per month would be \$18.50 for both trash and recycling services. This cost is in line with Coralville and Iowa City costs. Coralville's cost is \$20.00 for comparably sized receptacles. Iowa City charges \$17.10 for a similar program. The cost per month covers the large financial investment in receptacles and automated trucks.

Description	Current Cost per month	Proposed Cost per month
Recycling	\$4.85	Included in total
City Clean Up Day	\$0.30	\$0.30
Trash (assumes 2 stickers per week)	\$10.40	Included in total
Total	\$15.55	\$18.80

- The above table shows an average monthly cost; however, there are some households that use less stickers and some cases no stickers at all because they are getting rid of their garbage through other means (i.e. taking it to a work dumpster, which is not a legal option).
- The program for multi-family properties with dumpsters is still being worked through. Many units don't have space for a 95-gallon receptacle to be stored onsite. Steve is looking at options for how these units can be best served and what cost is appropriate for those units.
- Staff would begin a public education campaign immediately upon Council authorization to move ahead with the revised program.

Iowa City Community School District Site Plan

Recommended for approval by Planning Commission at their meeting on February 6, 2018.

January 26, 2018

<u>Memo</u>

To: North Liberty Planning Commission From: Dean Wheatley, Planning Director Subject: Site Plan Approval Request (Proposed Grant Elementary Addition)

Your North Liberty city staff has reviewed the subject submission, and offer comments presented in this memo. The staff review team includes the following personnel: Ryan Heiar, City Administrator Tracey Mulcahey, Assistant City Administrator Tom Palmer, City Building Official

Scott Peterson, City Attorney

Kevin Trom, City Engineer

Dean Wheatley, Planning Director

This is a request from the Iowa City Community School District to approve an elementary school site plan for land located between CENTRO manufacturing and N Front Street. A Good Neighbor meeting was held on October 26 for the rezoning (which is now completed) and plat to allow any interested party an opportunity to comment on this rezoning prior to submission, and eight people attended. Most were interested in the site plan rather than the rezoning, so staff contacted those who signed in to let them know a site plan has been submitted and offered to review it with them. Bob and Mary Burns, as well as Jesse Burns, strongly advocated for the extension of North Bend Drive to not curve as shown on the preliminary site plan but to extend straight east to N Front Street. Chuck Deisbach of South Slope also had concerns related to difficulty they have entering and exiting the South Slope driveway, which is where City staff has directed the future alignment of North Bend Drive to terminate. Staff provided early guidance to the school district's engineers to locate North Bend Drive at the location shown on the site plan, and we feel strongly that the southerly location advocated by the Burns' does not meet safety standards related to sight distance and would create dangerous turning movements on Front Street.

Traffic issues anticipated with the new school have been studied and redesigns for North Front Street and Penn Street in the vicinity are being considered, with construction anticipated prior to school opening, pending Council approval. North Bend Drive will be extended east to Front Street, and will provide the vehicular access points for the new school. The first access point is planned to be approximately 380 feet west of N Front Street, more than double the comparable distance at Garner school, which is anticipated to provide more vehicular storage and ease of access. Also, the intersection at N Front Street will be designed for better flow. The site is well served by the City's trail and sidewalk systems within the anticipated attendance area.

Setbacks far exceed the minimum requirements of the district, and storm water management features have been thoughtfully incorporated. The site topography is quite rolling, so the building will have the look of a single-story at the south and a two-story at the north elevations. The shortest dimension

between the proposed school building and the rear lot lines of homes in Cedar Springs is approximately 360 feet, more than a typical city block. Internal sidewalks are provided throughout the site, with connections to the City trails and sidewalks adjacent to the site.

Storm water basins are designed to incorporate a somewhat improved look when compared to the bare minimum, with a sinuous rock channels and native prairie seeding.

The building design is an attractive modern style with very high masonry content, numerous wall offsets, roof variety, and a sprawling presence.

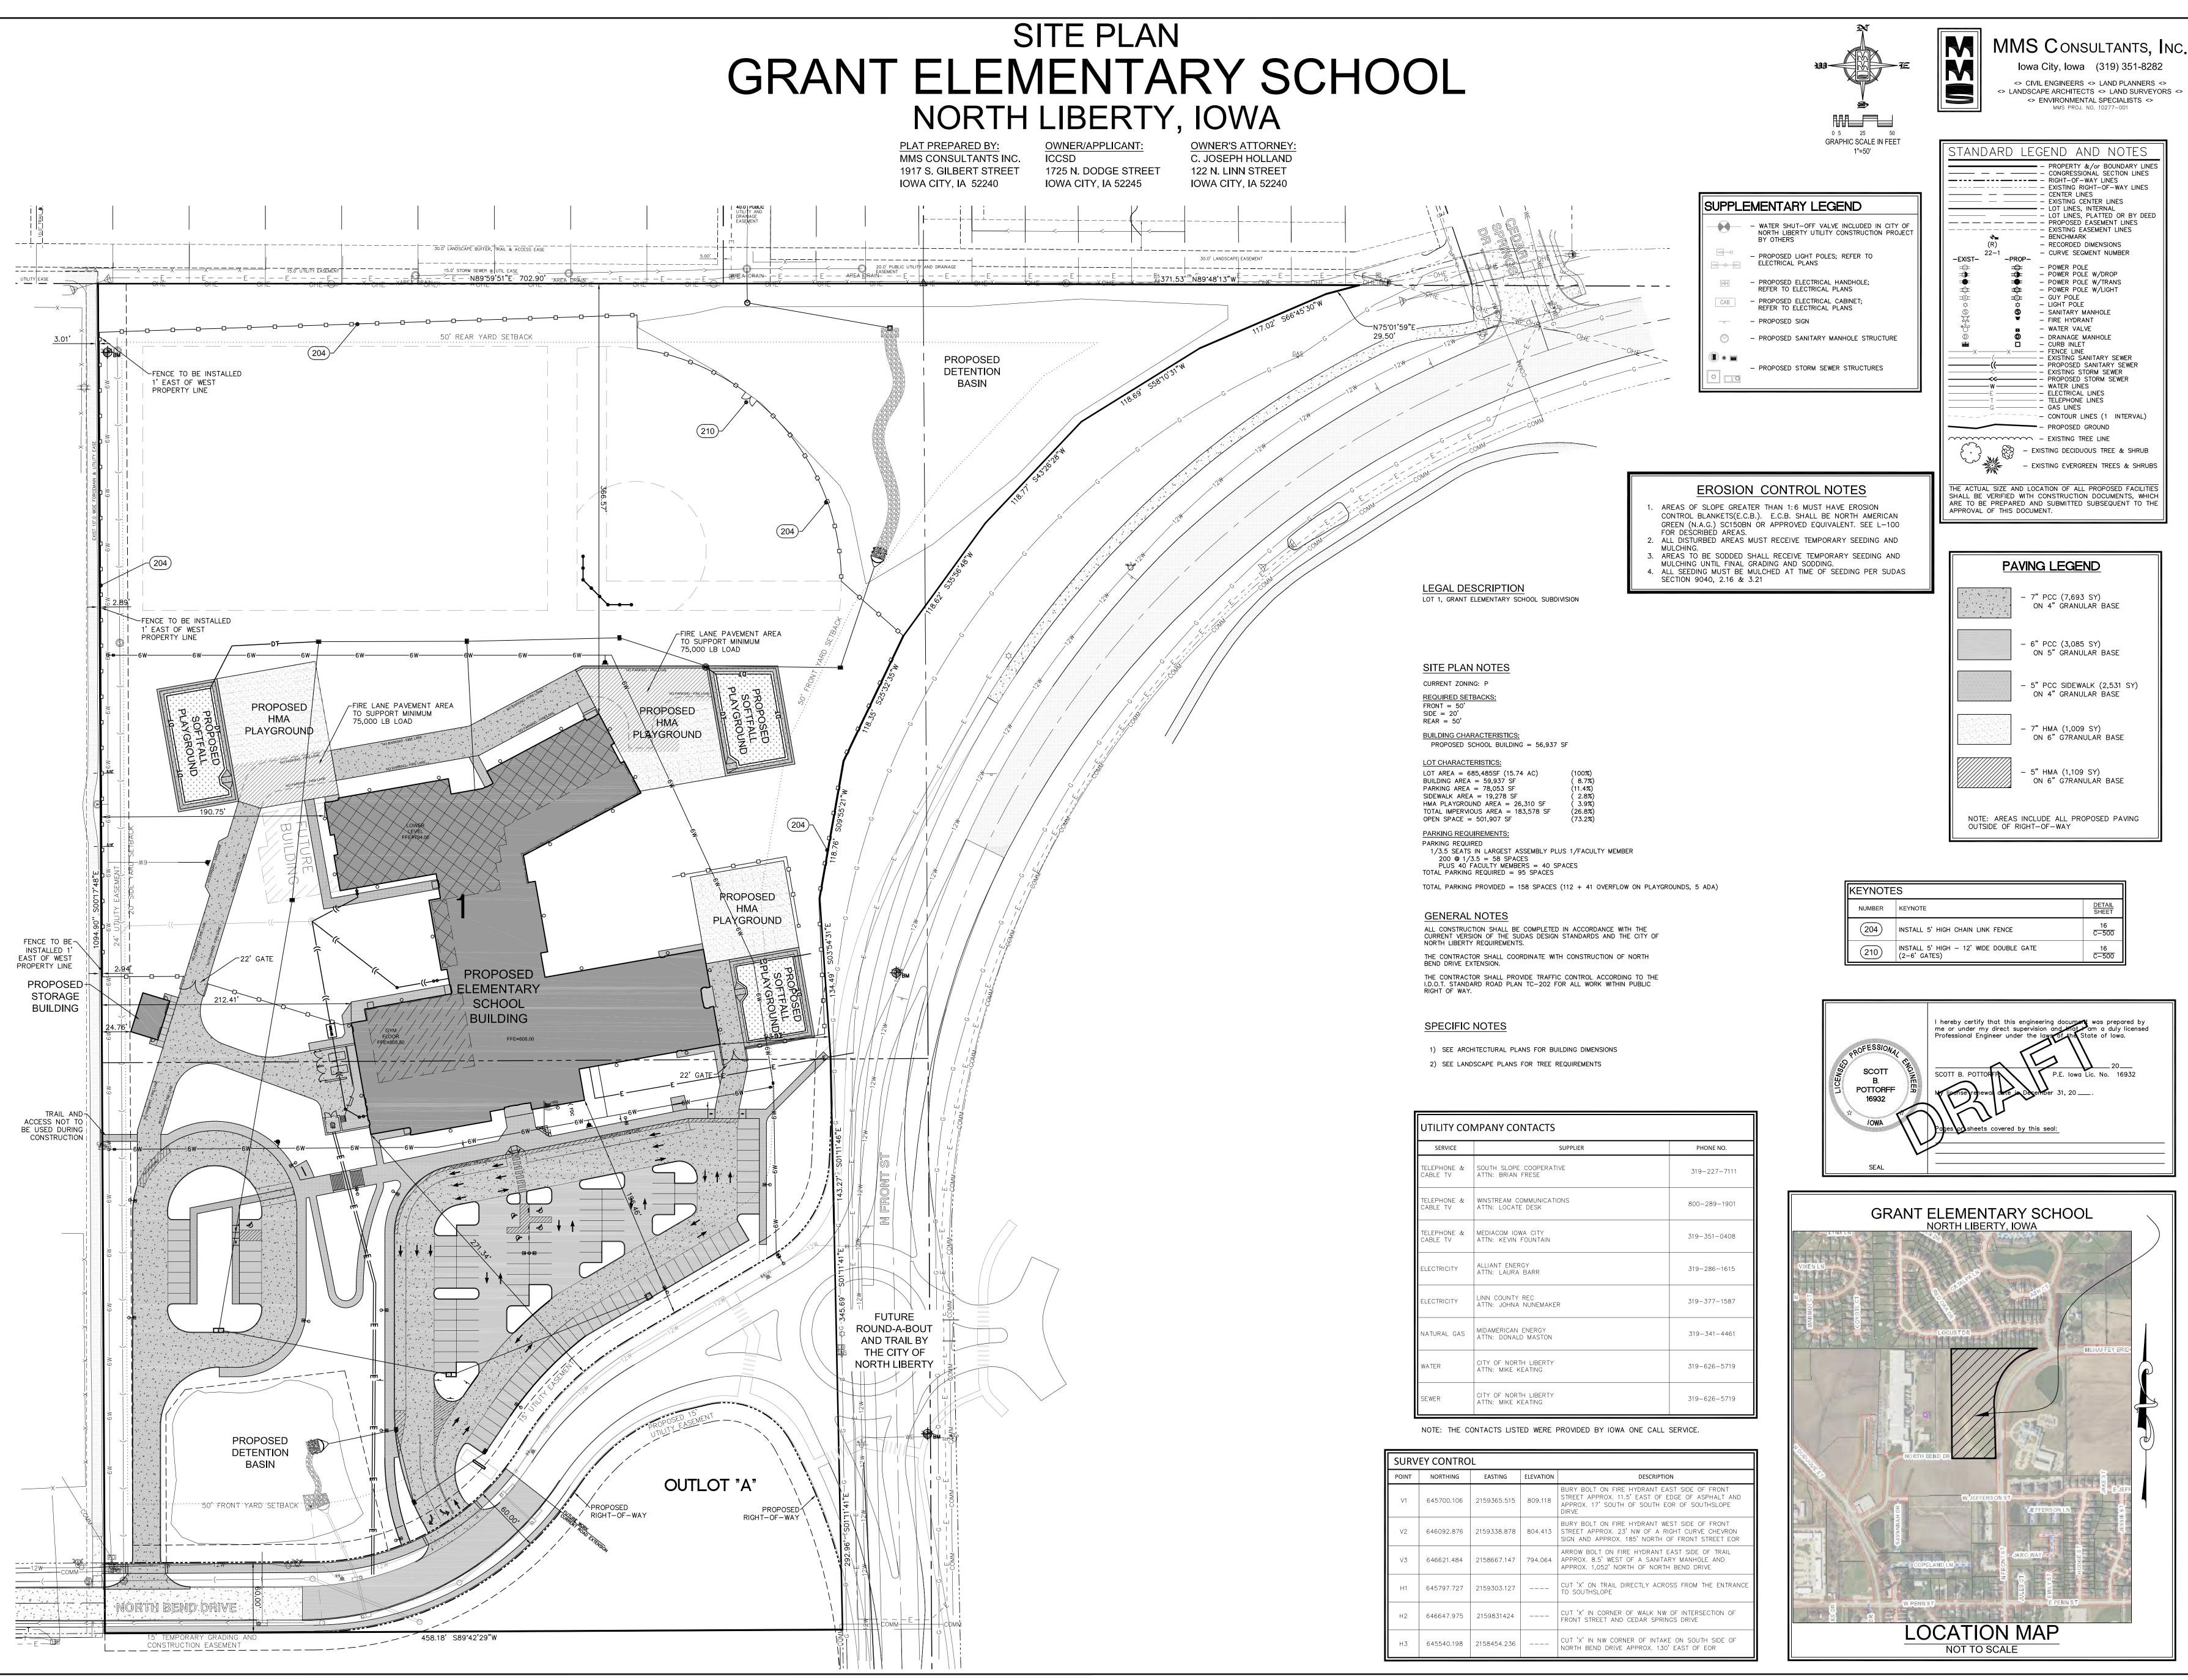

It is reasonable to compare this proposed school with the other recently built elementary, Garner, and here are some figures provided by the school district engineer:

	Garner	Proposed Grant
Student Population	665 (current)	600
Parking Count	138	158 (117 + 41 overflow on playgrounds)
Car Queuing Lane	520' from front door to Birch Street 740' total length	645' from front door to North Bend 910' total length

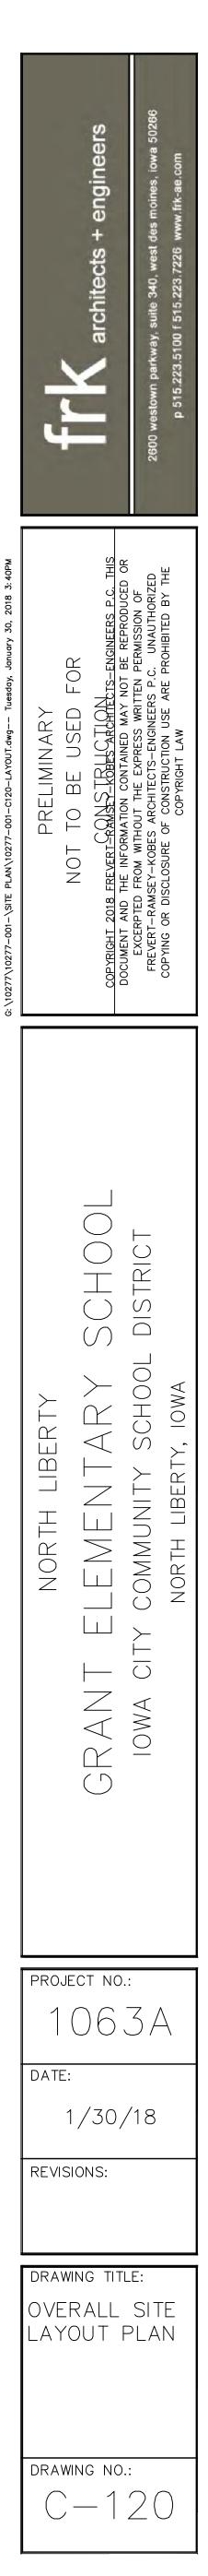

Staff recommends approval of the site plan. There are a number of notes for items that need to be taken care of as the overall City-School development process continues.

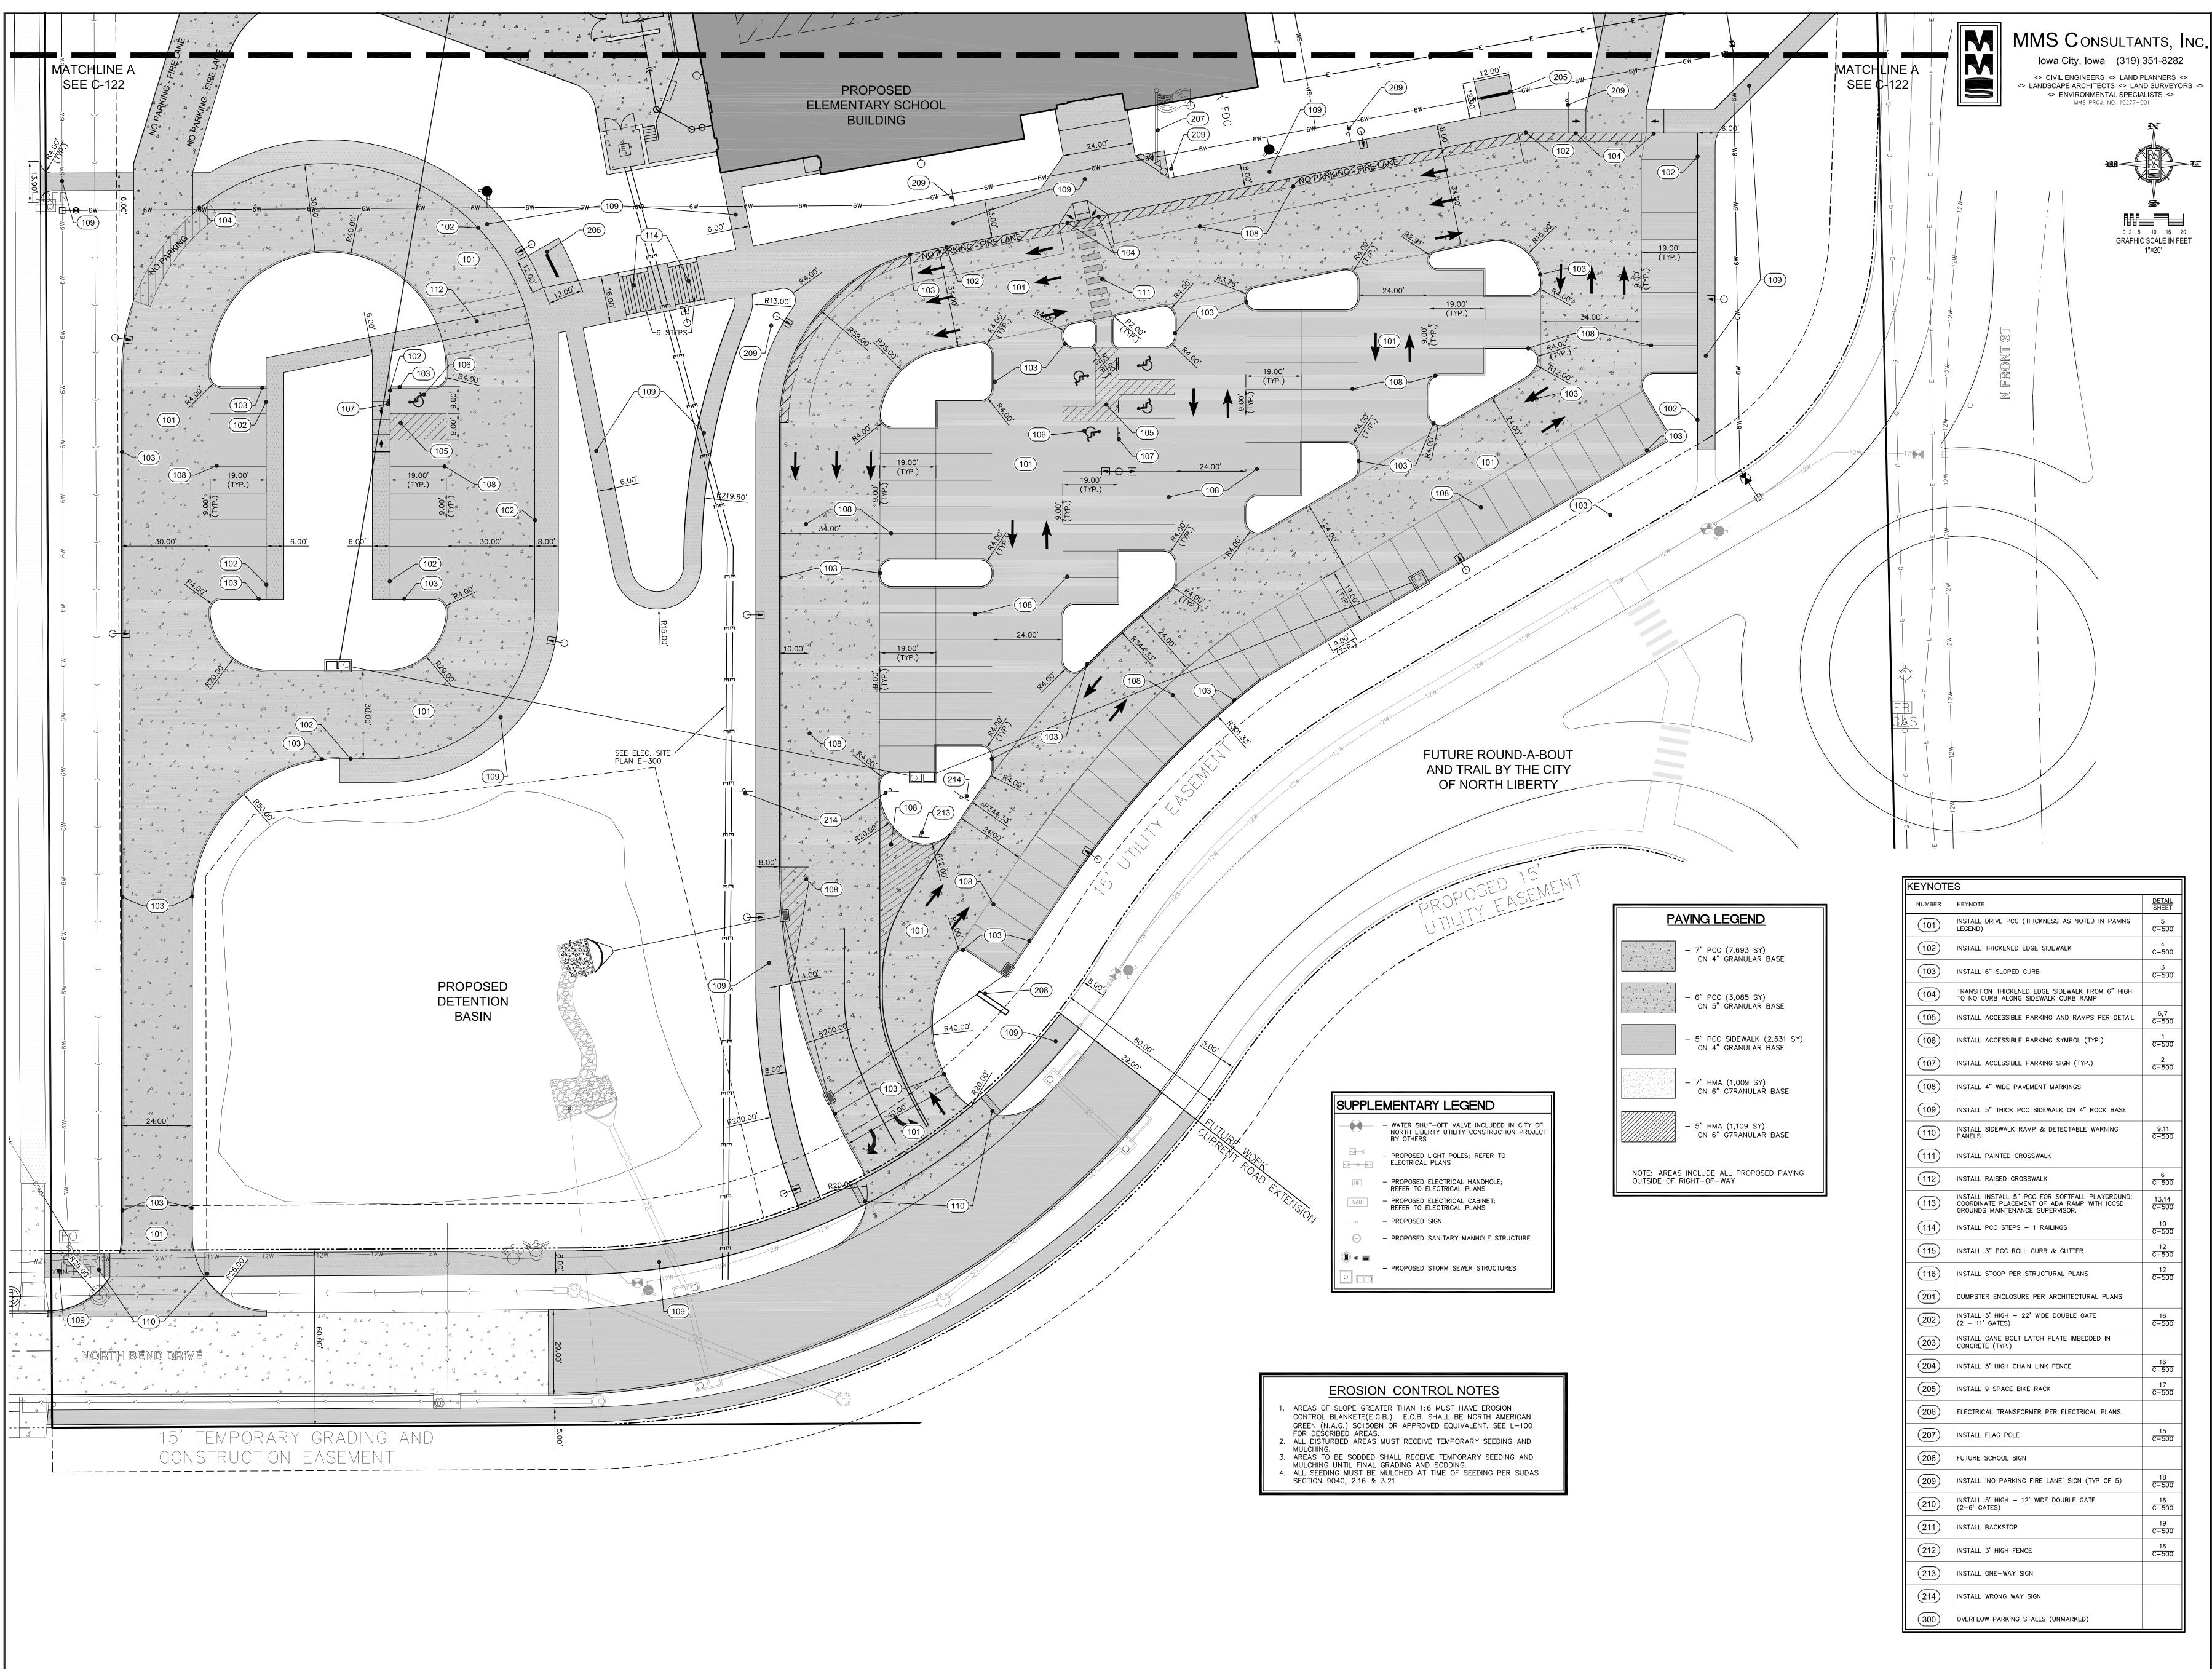

Notes:

- The preliminary plat, final plat, and BMP Agreement will need to be developed and submitted together after site plan approval but before occupancy is permitted. The BMP (aka SMF) maintenance agreement is required between the Owner and the City for long term maintenance responsibilities of the stormwater management features. The owner is to provide proposed maintenance requirements to the City Engineer in Word format so that the City Attorney can fold them into the standard agreement format.
- A Site Plan Agreement between the district and the City establishing obligations for a number of issues related to the short schedule needed by the school district to start construction will be required prior to issuance of a building permit. Items to be included in the agreement include:
 - Cost share for the proposed roundabout design and construction.
 - Schedule for completion of the preliminary plat, final plat, and BMP Agreement.
- Actual fire lane markings and signs will be determined by the fire department at a future time.

Cree Edge[™] Series

LED Area/Flood Luminaire

Product Description

The Cree Edge™ Series has a slim, low profile design. Its rugged cast aluminum housing minimizes wind load requirements and features an integral, weathertight LED driver compartment and high performance aluminum heat sinks. Various mounting choices: Adjustable Arm, Direct Arm, Direct Arm Long, or Side Arm (details on page 2). Includes a leaf/debris guard.

Applications: Parking lots, walkways, campuses, car dealerships, office complexes, and internal roadways

25' Mounting Height for LSA, LSB, LSD

15' Mounting Height for LSC

Performance Summary

Patented NanoOptic® Product Technology

Made in the U.S.A. of U.S. and imported parts

CRI: Minimum 70 CRI

CCT: 4000K (+/- 300K), 5700K (+/- 500K) standard

Limited Warranty⁺: 10 years on luminaire/10 years on Colorfast DeltaGuard[®] finish

Cree Edge[™] Series

LED Security Wall Pack Luminaire

Product Description

The Cree Edge™ wall mount luminaire has a slim, low profile design. The luminaire end caps are made from rugged die cast aluminum with integral, weathertight LED driver compartments and high performance aluminum heat sinks specifically designed for LED applications. Housing is rugged aluminum. Includes a lightweight mounting box for installation over standard and mud ring single gang J-Boxes. Secures to wall with four 3/16" (5mm) screws (by others). Conduit entry from top, bottom, sides and rear. Allows mounting for uplight or downlight. Designed and approved for easy through-wiring. Includes leaf/debris guard.

Applications: General area and security lighting

Performance Summary

Patented NanoOptic® Product Technology

Made in the U.S.A. of U.S. and imported parts

CRI: Minimum 70 CRI

CCT: 4000K (+/- 300K), 5700K (+/- 500K) standard

Limited Warranty⁺: 10 years on luminaire/10 years on Colorfast DeltaGuard[®] finish

Resolution No. 2018-12

RESOLUTION APPROVING THE DEVELOPMENT SITE PLAN FOR LOT 1, GRANT ELEMENTARY SCHOOL SUBDIVISION, NORTH LIBERTY, IOWA

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF NORTH LIBERTY, IOWA:

WHEREAS, the owner and developer, Iowa City Community School District, has filed with the City Clerk a development site plan;

WHEREAS, the property is legally described as: Lot 1, Grant Elementary School Subdivision, North Liberty, Johnson County, Iowa

WHEREAS, said site plan is found to conform with the Comprehensive Plan and the Zoning Ordinance of the City of North Liberty; and

WHEREAS, said site plan has been examined by the North Liberty Planning and Zoning Commission, which recommended that the site plan be approved.

NOW, THEREFORE, BE IT RESOLVED that the City Council of North Liberty, Iowa, does hereby approve the development site plan for Lot 1, Grant Elementary School Subdivision.

APPROVED AND ADOPTED this 13th day of February, 2018.

CITY OF NORTH LIBERTY:

TERRY L. DONAHUE, MAYOR

ATTEST:

I, Tracey Mulcahey, City Clerk of the City of North Liberty, hereby certify that at a meeting of the City Council of said City, held on the above date, among other proceedings, the above was adopted.

Resolution No. 2018-13

RESOLUTION APPROVING THE FINAL PLAT AND ACCEPTING IMPROVEMENTS FOR MICKELSON FIRST ADDITION, NORTH LIBERTY, IOWA

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF NORTH LIBERTY, IOWA:

WHEREAS, the owner, Hodge Construction Co. has filed with the City Clerk a final plat for the property described in Exhibit A, which is attached hereto and made a part hereof;

WHEREAS, said real estate is owned by the above-named parties and the subdivision is being made with the free consent and in accordance with the desires of the owners;

WHEREAS, said final plat is found to conform with Chapter 354 of the Code of Iowa and ordinances of the City of North Liberty;

WHEREAS, the requirements for property improvements, except for sidewalks, have been installed in accordance with the design standards and Municipal Code requirements of the City of North Liberty.

NOW, THEREFORE, BE IT RESOLVED that the final plat of Mickelson First Addition, as shown on the final plat, and that Property Improvements, except for sidewalks, are hereby approved and accepted.

BE IT FURTHER RESOLVED that all parcels shown on said plat to be dedicated to the City of North Liberty are hereby accepted.

APPROVED AND ADOPTED this 13th day of February, 2018.

CITY OF NORTH LIBERTY:

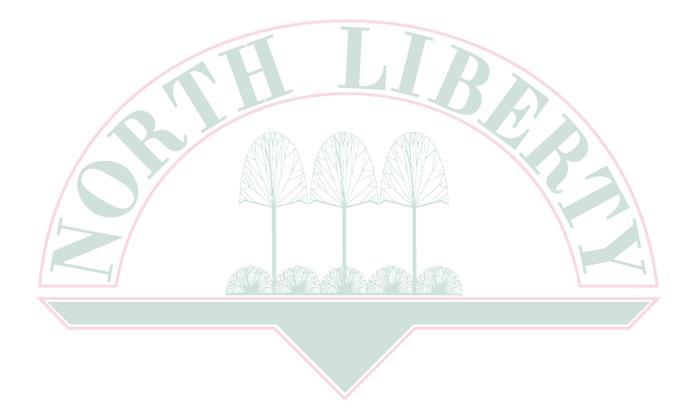

TERRY L. DONAHUE, MAYOR

ATTEST:

I, Tracey Mulcahey, City Clerk of the City of North Liberty, hereby certify that at a meeting of the City Council of said City, held on the above date, among other proceedings, the above was adopted.

TRACEY MULCAHEY, CITY CLERK

Lot 8, Golfview Site Plan

Recommended for approval by Planning Commission at their meeting on February 6, 2018.

January 26, 2018

<u>Memo</u>

To: North Liberty Planning Commission From: Dean Wheatley, Planning Director Subject: Site Plan Approval Request (Lot 8 Golfview Commercial, Part 2)

Your North Liberty city staff has reviewed the subject submission, and offer comments presented in this memo. The staff review team includes the following personnel: Ryan Heiar, City Administrator Tracey Mulcahey, Assistant City Administrator Tom Palmer, City Building Official Scott Peterson, City Attorney Kevin Trom, City Engineer Dean Wheatley, Planning Director

This request is to approve a site plan for multi-user commercial development on the east side of 965 between Lions Drive and Hawkeye Drive. Because of its high visibility on 965, good design is critically important.

The site layout is similar to other buildings nearby and logical considering the shape of the lot, with buildings oriented east-west and parking near the 965 right-of-way. It should be noted that 965 is substantially higher in elevation than the lot under review. The site planning and landscaping plan meet basic requirements for development with a few exceptions noted below. There is no outside storage or display shown so none will be allowed unless specifically approved at a later time.

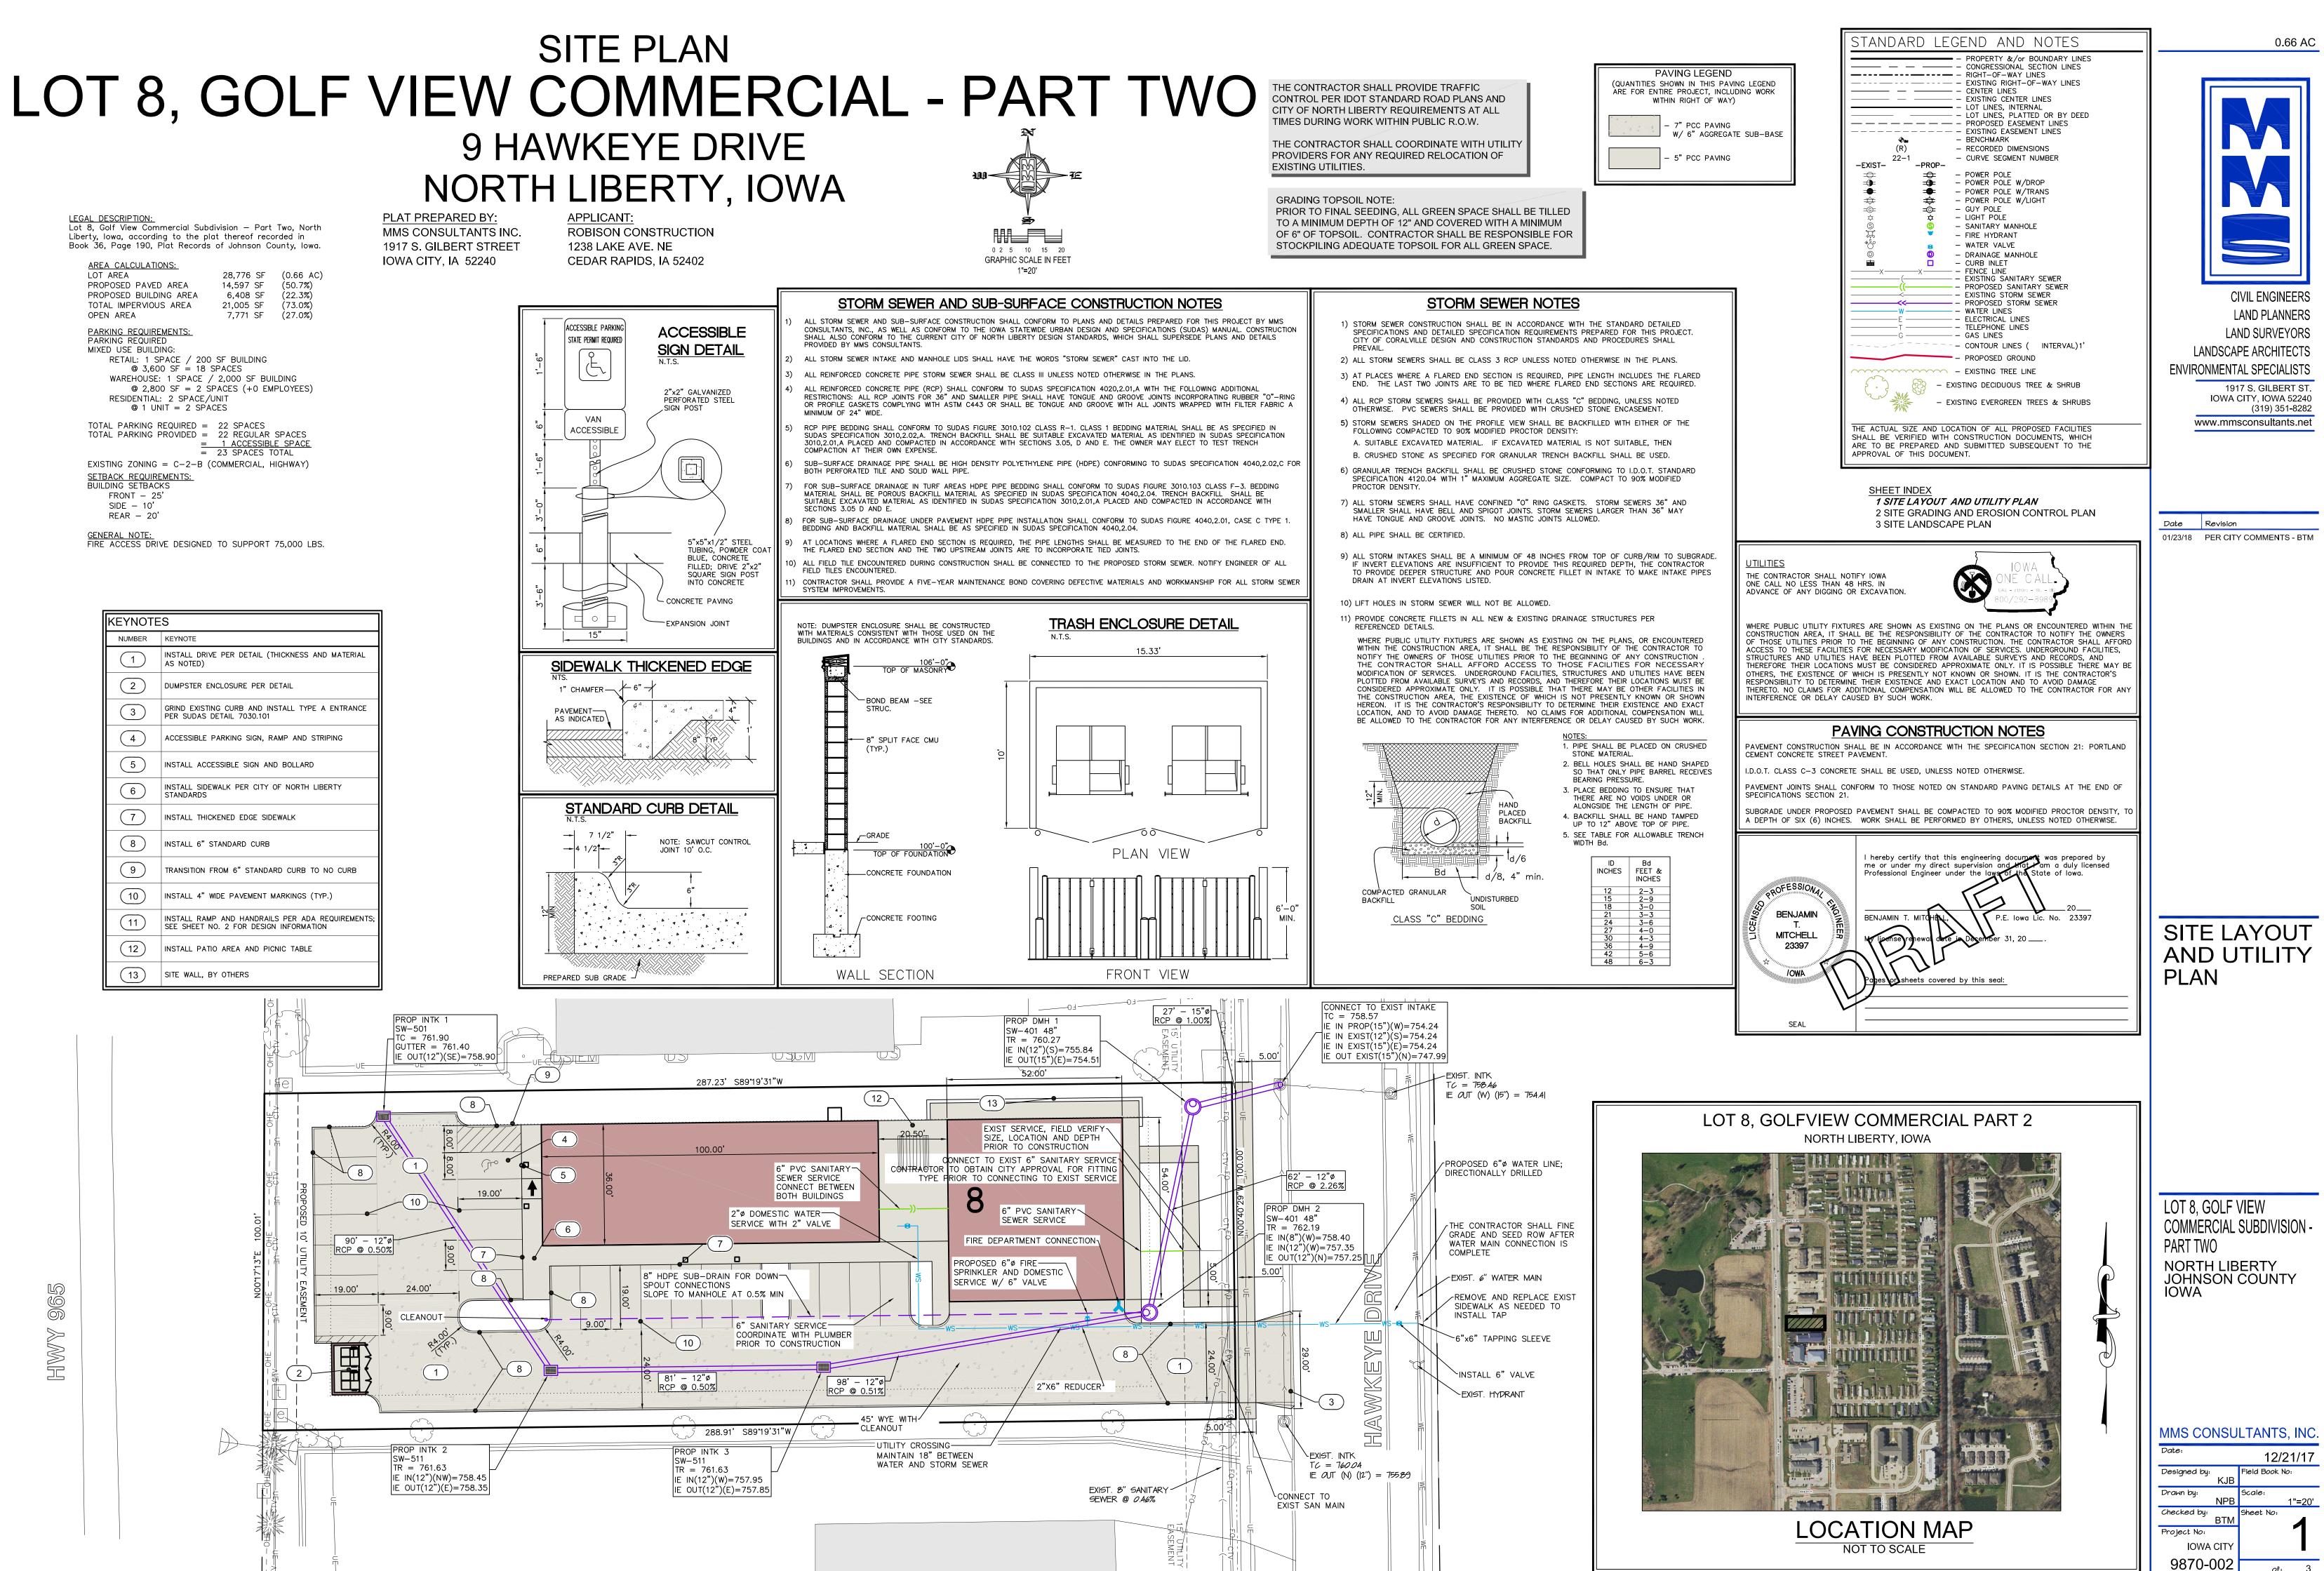

While the parking proposed meets the requirements as identified in the parking table on the site plan, any future uses will be extremely limited because of those numbers used, so as with other recent similar developments, an Owner's Acknowledgement of this issue and of possible occupancy certificate limitations is required prior to approval.

The building design is proportional and features a good mix of materials used well to create an interesting site, with windows, doors, and awnings that work well together.

The applicant has worked well with City staff to resolve issues in previous submissions, and this site plan is recommended for approval.

Notes:

• Fire Department sprinkler connection for east building (Building #2) shall face Golfview Drive. FDC sprinkler connection location will be determined during fire sprinkler plan review.

DESCRIPTION

The Halo LT560 is an LED Baffle-Trim Module for 5" and 6" aperture recessed downlights; suitable for new construction, remodel and retrofit installation. The LT560 is cULus Listed for use with Halo and All-Pro, and is UL Classified for use with other compatible 5" and 6" housings. Precision construction makes any housing AIR-TITE for added HVAC savings and code compliance.

Catalog # Туре Project Date Comments Prepared by

SPECIFICATION FEATURES

MECHANICAL Module - Trim

 Module construction includes LED, heat sink, reflector, lens, baffle and trim ring

Lens

- Regressed lens
- Impact-resistant polycarbonate Convex form for lamp-like
- appearance
- Diffusing for even illumination

Mounting

• Torsion springs are pre-installed and adjust to fit 5" and 6" compatible housings

Housing Compatiblity

See Housing Compatibility

I FD

- Color Temperature (CCT) Options: 2700K, 3000K, 3500K, 4000K, 5000K
- CRI: 90
- 90 CRI can be used for California Title 24 compliance/ certified to Title 20

LED Chromaticity

- A tight chromaticity specification ensures LED color uniformity, sustainable Color Rendering Index (CRI) and Correlated Color Temperature (CCT) over the useful life of the LED
- LED chromaticity of 3 SDCM exceeds ENERGY STAR® color standards per ANSI C78.377- 2011
- High color performance with R9 greater than 50
- Halo LED serialized testing and measurement ensures color and lumen consistency on a per-unit basis, and validates long-term product consistency over time

ELECTRICAL

Power Connections

 LED connector is a non-screw base luminaire disconnect offering easy installation with the matching Halo 5" and 6" LED housings

- LED Connector meets California Title-24 high efficacy luminaire requirement for a non-screw base socket, and where required to qualify as a high efficacy luminaire
- The included E26 medium screw-base Edison adapter provides easy retrofit of incandescent housings
- (see Housing Compatibility) • L70 at 35,000 hours.

Ground Connection

Separate grounding cable included on the module for attachment to the housing during installation

LED Driver

- 120V 50/60 Hz constant current dimmable driver provides highefficiency operation
- · If dimming is not required the fixture can be operated from a standard wall switch

Dimming

- Designed for continuous dimming capability to nominally 10% with many 120V Leading Edge (LE) and Trailing Edge (TE) Phase Control dimmers. (Dimmers with low end trim adjustment offer greater
- assurance of achieving 10% level.) · Consult dimmer manufacturer for compatibility and conditions of use

Note: some dimmers require a neutral in the wallbox.

Warranty

Five-year limited warranty.

Compliance Labels

- UL/cUL Listed 1598 Luminaire (with listed housings)
- UL Classified (with other housings - see Housing Compatibility)
- UL/cUL Listed for Damp Location
- UL/cUL Listed for Wet Location covered ceiling - Shower Applications
- IP56 Ingress Protection rated

Refer to ENERGY STAR® Certified Products List. Can be used to comply with California Title 24 High Efficacy requirements. Certified to California Title 20 Appliance Efficiency Database

• May be installed in housings in direct contact with insulation* and combustible material

COMPLIANCE

- · Airtight certified per ASTM-E283-04 (not exceeding 2.0 CFM under 75 Pascals pressure difference)
- Can be used to comply with California Title 24 High Efficacy requirements. Certified to California Title 20 Appliance Efficiency Database.*
- Can be used for International **Energy Conservation Code** (IECC) high efficiency luminaire compliance.
- ENERGY STAR® Certified luminaire - consult ENERGY STAR® Certified Product List* • EMI/RFI per FCC 47CFR Part
- 15 Class B Consumer limits, suitable for use in residential and commercial installations
- Contains no mercury or lead and RoHS compliant.
- · Photometric testing in accordance with IES LM-79
- Lumen maintenance projections in accordance with IES LM-80 and TM-21
- Can be used in closets. Compliant with NFPA 70, NEC section 410.16 (A)(1) and 410.16 (C)(3).
