

Customers of new residential properties are eligible for a one-time sewer bill credit for use of water to nurture grass after the ground has been seeded or sodded, as is necessary for final stabilization of any remaining disturbed area after construction. Upon written application, a credit for the sewer portion of the bill of up to 25,000 gallons is available if:

- the seeding has already been completed or the sod has already been laid;
- the application is submitted within thirty (30) days after the seeding is completed or the sod is laid;
- the customer used the amount of water for which a credit is being requested for watering and for no other purpose; and
- no other party has been given such a credit for the same property.

In the event any application submitted to the City is not true or correct, the credit shall either not be given or, if given, shall be forfeited to the City. Properties are only eligible for one sod credit in the first growing season after construction is completed.

Date of Application: _____

Owner/Applicant: _____

Address: _____

Date of sod installation (receipt attached): _____

I certify that this application is true and correct and that the water used was solely for the establishment of sod or seed.
